(904) 316-5108

Senior Software Engineer with 13+ years of experience designing, building, and modernizing web applications, APIs, and data processing systems.

Languages: JavaScript / TypeScript, C#, PHP, HTML, CSS

Databases: Elasticsearch / OpenSearch, PostgreSQL, MSSQL

Frameworks: React, Next.js, Hapi, Nest.js, Angular

AWS Services: Lambda, S3, Step Functions

Other Services: GitHub Actions, Jenkins, NewRelic, PagerDuty, RabbitMQ

Senior Software Engineer

Aug 2021 - Oct 2026, The Knot Worldwide

- Built and maintained a **GraphQL API** handling **9M+ requests per day** with an **average response time of 60ms**
 - Designed and implemented an **asynchronous data pipeline** using **RabbitMQ** to synchronize updates from multiple systems into **OpenSearch**
 - **Collaborated across departments** with Product, Design, Data, QA, and DevOps to design and develop new web application features
-

Senior Software Engineer

Oct 2018 - Jul 2021, BAM Technologies

- Rewrote an existing government web application (**C#, MSSQL**) using a platform-agnostic technology stack (**Node, TypeScript, Angular, PostgreSQL**) to prevent vendor lock-in and moved it from a military datacenter to **AWS GovCloud**
 - **Rewrote an ETL pipeline** to import data from **over 200 heterogeneous data sources** and **reduced processing time by 97.5%**, from over 8 hours to under 12 minutes, using parallel processing with AWS Lambda, Step Functions, and S3
 - **Reduced query times by 98.33%**, from over 30 seconds to under 500 milliseconds, by moving search data from MSSQL into Elasticsearch
 - **Regularly conducted meetings with government stakeholders** to demonstrate new features, gather feedback, and propose future changes
 - **Conducted hiring interviews** and mentored new engineers
-

Application Developer

Oct 2017 - Oct 2018, Oyova Software

- Designed, developed, and tested new features and bug fixes for clients' websites
 - **Communicated directly with clients** daily via email and phone to gather requirements, discuss project timelines, and provide status updates
-

Application Developer

Nov 2013 - Oct 2017, MECLABS

- **Developed and maintained an internal web app** which replaced the use of manual spreadsheets, standardized data collection, and enabled data analysts to find insights that were not previously possible
 - **Communicated regularly with stakeholders** to gather requirements and demonstrate new features
 - **Lead training workshops to teach 50+ employees** how to replace their previous workflows with the web application my team built
-

Quality Assurance Specialist

Jan 2013 - Nov 2013, MECLABS

- Performed manual **user-acceptance testing** of web applications
 - Audited the configuration of site analytics tools and **A/B split tests**
 - Created an automated testing tool using **Java, Selenium, and WebDriver** to perform **automated regression tests**
-
